

MAYA KHETAN

ASPIRING DEVOPS ENGINEER

Jaipur, Rajasthan, India | khetanmaya2@gmail.com | [GitHub](#) | [LinkedIn](#)

Aspiring DevOps Engineer and Computer Science student with hands-on experience in Python, AWS (EC2, S3, IAM), Linux, Git, GitHub, and GitHub Actions. Built automation and cloud deployment projects using Python and AWS. Passionate about cloud infrastructure, DevOps, and automation, with a strong foundation in CI/CD and problem-solving.

EXPERIENCE

Decodelabs - Cloud Computing (AWS/Azure) Intern

May 2026 - Present | Remote

- Working on hands-on cloud projects involving cloud infrastructure and deployment concepts.
- Learning cloud security, networking, storage, and compute services.
- Exploring DevOps fundamentals including CI/CD workflows and cloud automation.
- Collaborating with mentors and peers to complete project milestones and practical assignments.

TechnoHacks Solutions Pvt. Ltd. - Cloud Computing Intern

June 2026 - Present | Remote

- Applying cloud fundamentals to real-world use cases and technical tasks.
- Learning infrastructure provisioning, cloud service management, and monitoring concepts.
- Working on cloud-based projects and deployment workflows.

SKILLS

- Linux
- Git & GitHub
- Shell Scripting
- Python
- Networking Fundamentals
- Docker (Learning)
- AWS EC2
- AWS S3
- AWS IAM
- AWS CLI
- Boto3

EDUCATION

Bachelor of Technology in Computer Science & Engineering

2024 -2028 (Expected)

- Poornima University, Jaipur, India
- CGPA: 9.17/10

PROJECTS

Serverless Image Processing System using AWS

- Python, AWS Lambda, Amazon S3, DynamoDB, IAM, CloudWatch**
- Developed an event-driven serverless image processing application using AWS Lambda and Amazon S3.
- Generated image thumbnail automatically using Pillow and stored processed images in Amazon S3.
- Stored image metadata in Amazon DynamoDB and monitored executions with CloudWatch.
- Implemented IAM roles and Lambda Layers following AWS best practices.

Automated Backup System with AWS S3 & GitHub Actions CI

- Python, Amazon S3, AWS Lambda, IAM, CloudWatch, GitHub Actions**
- Developed an automated backup system that compresses files and uploads them to Amazon S3.
- Used Git and GitHub Actions to automatically execute the backup workflow on every code push.
- Configured Amazon S3 events to trigger AWS Lambda for backup verification.
- Used CloudWatch Logs to monitor serverless execution.
